- Hygiene is an essential part of the Icelandic swimming pool culture. Despite relatively low levels of chlorine in Icelandic pools, the pools are clean and free from harmful bacteria. This is because we maintain good hygiene. Please do not arrive to the pool wearing your swimsuit. Please shower with soap and without your swimsuit. Please shower again after using sauna/steam bath before entering the pool/hot tubs. Those who do not follow these rules will be asked to leave the swimming pool.
- According to health regulations in Iceland, those under the age of 10 years are not allowed to enter swimming pools without adult company. Anyone that turns 10 years old in the calendar year is allowed to enter without a guardian after the 10th of June. Younger guests must be accompanied by an adult or an individual at least 15 years of age or older who may not accompany more than two children, except in the case of a parent or a guardian.
- The swimming pool is not open when the weather is too cold. To determine whether a swimming pool is open due to cooling, a wind turbine reference table is used. The table shows the effect of the wind for cooling the swimming pool. An automatic weather station is by the pool and used to decide to open the swimming pool. The hot tub and the sauna are always open.
